

PURHEART

Capabilities

Our Goals

- Provide effective hot and cold therapy products for injury relief and recovery.
- Target construction and electrical industries to support worker safety.
- Ensure easy deployment of therapy tools in non-clinical environments.
- Offer customizable solutions for specific industry and patient needs.
- Support injury prevention through accessible, on-site products.

Our Solutions

- 1 We can expand our online platform and partner with local distributors to ensure our products reach even the most remote locations. We offer real-time product availability and shipping updates to keep our customers informed.
- 2 We will implement a personalized recommendation system that guides customers to the right products based on their specific needs and provide comprehensive educational resources like tutorials and expert advice to make the decision process more manageable.
- 3 We will provide clear warranties and quality assurances, alongside showcasing customer reviews and success stories, to help our customers feel confident about the durability and effectiveness of our products.
- 4 We will collaborate with healthcare providers, including hospitals and clinics, to integrate our products into recovery plans and offer pre-packaged recovery kits tailored to specific treatments for a more coordinated recovery process.

Innovative and Effective Solutions

We provide equipment advancements and advocate for standardized therapy to maximize heat and cool therapy's benefits.

Product Development & Customization

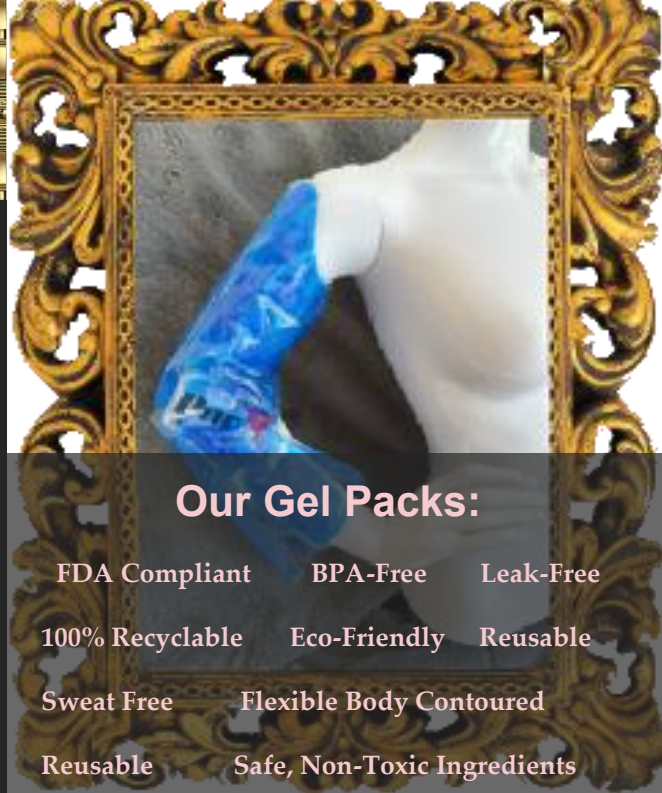

Customization is one unique method that we provide to ensure that our products are carefully designed and perfectly contoured to the body to provide targeted relief and comfort while ensuring that the recovery process is easy and comfortable.

Project Management

Our patient-centric and value-based design and execution approach enables us to identify real needs from the ground up and deliver outcomes-improving solutions. Our strategic project management mechanism includes impact and implementation analysis, project deployment and placements, as well as impact monitoring and evaluation.

Training and Maintenance

We offer product demonstrations to assist the healthcare team, and their patients understand the role of cool/hot therapy in pain relief, as well as the methods for applying it to their bodies.

Our Gel Packs:

- FDA Compliant
- BPA-Free
- Leak-Free
- 100% Recyclable
- Eco-Friendly
- Reusable
- Sweat Free
- Flexible Body Contoured
- Reusable
- Safe, Non-Toxic Ingredients

Differentiators - 4 C's (What Sets Us Apart)

Compassion Care-focused approach

Customization Body-contoured design

Compliance FDA-approved & eco-safe

Credibility Clinically trusted solutions
